Total Net Asset Value of the whole Fund:	16,182,897,666 HUF
Net Asset Value of EUR series:	389,531 EUR
Net Asset Value per unit:	1.162963 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 10.58 %
Annualized standard deviation of the benchmark's weekly yields: 10.16 %

MARKET SUMMARY:

During July, a slight increase was observable in the price of the main equity indices; both developed and emerging markets managed to increase their value, moreover the US NASDAQ index hit a new historical peak. The second quarterly flash report season started last month, thus market movements were influenced not only by the "trade war" but also by the results of companies. Facebook's shares fell more than 20% after publishing its results because the number of users of the social media site grew less than analysts' expectations.

At the beginning of the month, the "trade war" between Washington and Beijing came to a new level after the tariffs that affect more than 800 Chinese products worth \$34 billion came into effect, in addition, Donald Trump continued to say that the final amount could reach \$550 billion. Nevertheless, by the end of the month the tension decreased, after the Trump-Juncker meeting in Washington ended with the approach of positions that reduced trade-war fears.

In July, Donald Trump and Vladimir Putin met in Helsinki, which was closed without any substantial progress but Trump's contradictory statements made a big turmoil in the American politics.

In Turkey, new negative news have emerged, which put pressure on the performance of the Turkish equity market. In the middle of the month, Fitch downgraded Turkish debt rating to "BB", outlook negative, moreover, the Turkish central bank left the interest rates unchanged, bucking market expectations and causing further lira weakening.

The British people started to lose faith in the success of the May-led Brexit negotiation, which is further enhanced by the resignation of Boris Johnson and David Davis, the Minister of Foreign Affairs and the Brexit Secretary. Although the British Parliament voted for Theresa May's Brexit plan but the EU has rejected May's proposal.

In July, investors realized profit in the oil market, after the US government is willing to negotiate with Iran's oil buyers about the zero oil import from November. Furthermore, OPEC'S (Organization of the Petroleum Exporting Countries) oil production in July hit a new yearly high and grew to 32.64 million barrels a day, which put also pressure on the price of oil.

In July, within the developed markets, Europe and America outperformed compared to the Japanese market. The fund was an underperformer in July, because we were waiting for a bigger market correction thus the fund was not filled completely with equities. Slightly underweighted US and Japanese positions were held in the fund, while the European papers were more underweighted, which allocation had relative negative impact on the fund's performance.

ASSET ALLOCATION OF THE FUND ON 07/31/2018
