Net Asset Value of R series:	543,763,250 HUF
Net Asset Value per unit:	0.849552 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to earn capital gains by taking positions in a wide range of assets while keeping risk under pre-defined limits. The assets are selected based on fundamental and technical criteria from the widest range of industry and country exposures possible. Based on medium and long-term trends, the fund can buy or sell equities, bonds and other securities, and take various exposures using exchange (futures, options) and OTC derivatives (IRS and currency forwards). Naked shorts on securities are not allowed. The manager selects and builds positions based on fundamental and technical analysis in such a way, that the fund's return can exceed that of bank deposits over a medium-term horizon. Equally important focus is given to risk management which targets Level 5 risk bracket. The fund is not targeting any specific sectors, countries or asset classes, but most of its exposures will be taken on US and European exchanges, or markets regulated by the capital market authorities of the United States of America and the countries of the European Union. The fund's net corrected risk exposure may go up to 200 percent of the portfolio, in accordance with the Hungarian capital market acts and regulations. The fund can also run a net short exposure, also in accordance with the above mentioned regulatory limits.

MARKET SUMMARY:

During July, a slight increase was observable in the price of the main equity indices; both developed and emerging markets managed to increase their value, moreover the US NASDAQ index hit a new historical peak. The second quarterly flash report season started last month, thus market movements were influenced not only by the "trade war" but also by the results of companies. Facebook's shares fell more than 20% after publishing its results because the number of users of the social media site grew less than analysts' expectations.

At the beginning of the month, the "trade war" between Washington and Beijing came to a new level after the tariffs that affect more than 800 Chinese products worth \$34 billion came into effect, in addition, Donald Trump continued to say that the final amount could reach \$550 billion. Nevertheless, by the end of the month the tension decreased, after the Trump-Juncker meeting in Washington ended with the approach of positions that reduced trade-war fears.

In July, Donald Trump and Vladimir Putin met in Helsinki, which was closed without any substantial progress but Trump's contradictory statements made a big turmoil in the American politics.

In Turkey, new negative news have emerged, which put pressure on the performance of the Turkish equity market. In the middle of the month, Fitch downgraded Turkish debt rating to "BB", outlook negative, moreover, the Turkish central bank left the interest rates unchanged, bucking market expectations and causing further lira weakening.

The British people started to lose faith in the success of the May-led Brexit negotiation, which is further enhanced by the resignation of Boris Johnson and David Davis, the Minister of Foreign Affairs and the Brexit Secretary. Although the British Parliament voted for Theresa May's Brexit plan but the EU has rejected May Brexit's proposal.

In July, investors realized profit in the oil market, after the US government is willing to negotiate with Iran's oil buyers about the zero oil import from November. Furthermore, OPEC'S (Organization of the Petroleum Exporting Countries) oil production in July hit a new yearly high and grew to 32.64 million barrels a day, which put also pressure on the price of oil.

In July, we closed our short positions in the US and emerging markets, while we increased the weight of the regional banking sector in the fund. The performance of July was boosted by the Bund short position and the rise in the PlayWay's price, while our positions on the Turkish equity market detracted somewhat. After PlayWay (Polish videogame developer) came close to the historical high seen in May we started to take profit. Regarding the fund's fixed income exposure, we continue to hold the long Hungarian and short Polish government bond positions.
