Net Asset Value of HUF series:	7,481,656,716 HUF
Net Asset Value per unit:	2.27787 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, very low-risk investment vehicle, but to offer investors better returns than bank deposits. The portfolio elements are selected in accordance with these principles. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills distributed by the State Debt Management Centre (ÁKK), and bonds issued by the National Bank of Hungary. The average duration of the assets in the portfolio is 6 months, and the average remaining life of the assets may not exceed 12 months. The fund is low-risk, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to ensure a higher return than government securities. In the case of floating rate, forint denominated debt securities the average duration is equal to the number of days remaining until the next interest payment day. The fund may also invest its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Money Market Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

The level of liquidity injected to the banking system via FX swap tenders kept stagnating 1 989 billion HUF in July. At the same time, the communication of the MPC of the NBH turned hawkish compared to the previous ultra-dovish tone. The improvement of the international, and especially the EM sentiment along with the HUF gaining some strenght resulted in the decrease of both bond and money market yields. The GDMA has increased the issued amount of treasury bills at some auctions held in July, and also , 6-week liquidity T-Bills. The average yields evolving at the auctions receded gradually, thus the average yield of the 3-month auctions decreased from 16 to 10 basis points, while the average yield of the 12-month auctions decreased from 56 to 53 basis points. The 6-week liquidity auctions were bid at an average yield of 18 and 9 basis points, respectively. The 3-month reference yield decreased from 13 to 11 basis points, while the 12-month reference yield decreased from 61 to 47 basis points.
