Net Asset Value of USD series:	9,943,081 USD
Net Asset Value per unit:	1.097227 USD

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achive the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Morever, the Fund can trade on the option market. The portfolio of the Fund is separeted into three classes according to their investment objective: Instruments of the first class consist of long postions of long term, fundamentaly undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short postions on the futures markets. These postions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%

MARKET SUMMARY:

In September, major equity indices did not show any significant change, emerging markets performed similarly to their developed counterparts but Japan proved to be an outperformer.

In the beginning of the month, the sentiment around the trade war became better thanks to the news about the new negotiation between China and America but in the middle of the month, Donald Trump hit China with tariffs on another \$200 billion worth of Chinese goods with 10% duty, that will increase to 25% at the start of 2019. In response to that, China has cancelled all trade negotiations with America thus the trade war tensions continued to increase in September.

September was also rich in central bank pulses. The Bank of England and the European Central Bank have not changed the monetary policy conditions as expected but the Turkish central bank has raised its key interest rate to 24% in a dramatic bid from 17.5% to control inflation and prevent a currency crisis. Following the decision, the Turkish lira started to rise and the Turkish equities closed the month in the black. The Federal Reserve has raised US-short term interest rate by 25 basis points to 2-2.25 per cent and further strengthened the chance of another tightening in December, the market gives 85% probability for the next interest rate hike this year.

Until end of September, Italian assets could rise and the Italian yield spreads fell which caused rise in the banking sector. However, by the end of the month the Italy's coalition government agreed on a 2019 deficit at 2.4 percent of GDP compared to the EU's preferred level of less than 2 percent, which caused a significant drop in the Italian risky assets while the Italian 10 year government bond hit 3.4 per cent with almost a 20% increase.

In September the oil could also increase its price, the oil market is currently characterised by constriction of the supply-side: in addition to the expected impact of Iranian sanctions, US oil reserves have significantly fallen while the hurricane Florence has also supported the price of the black gold.

In September we closed our Emerging market short position, because we felt that too many negatives are priced in the market, moreover we bought Google and Alibaba equities. In the middle of the month, we entered into long position in the Polish midcap companies; in our view the significant drop in the first part of September was not caused by the fundamentals, rather the outflows from the Polish mid and small cap funds
