Net Asset Value of R series:	2,488,556,754 HUF
Net Asset Value per unit:	1.180855 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

MARKET SUMMARY:

Main market themes remain unchanged: a booming US economy, trade war tensions and outperformance of US assets. Markets were slightly less eventful than a month before as the larger than expected Turkish rate hike (+6,25%!) managed to calm tensions. US yields continued to climb higher, German-US spread widened further as European risk appetite was more modest amid the Italian and Turkish developments. The local yield curve steepened, short yields fell amid the new message from the central bank (we are prepared for tightening, but we are not there yet) and the improving liquidity position of the budget. We closed our DAX long and Italy spread tightener positions close to the opening levels after the government announced higher than expected budget deficit targets. We reduced our Azerbaijani and Polish USD bond positions while we added OTP bonds and floating rate HUF government papers.

ASSET ALLOCATION OF THE FUND ON 09/30/2018
