Net Asset Value of HUF series:	7,523,780,289 HUF
Net Asset Value per unit:	1.463511 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in order words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Annualized standard deviation of the fund's weekly yields: 1.94 %

Annualized standard deviation of the benchmark's weekly yields: 0.00 %

MARKET SUMMARY:

In September, major equity indices did not show any significant change, emerging markets performed similarly to their developed counterparts but Japan proved to be an outperformer. In the beginning of the month, the sentiment around the trade war became better thanks to the news about the new negotiation between China and America but in the middle of the month, Donald Trump hit China with tariffs on another \$200 billion worth of Chinese goods with 10% duty, that will increase to 25% at the start of 2019. In response to that, China has cancelled all trade negotiations with America thus the trade war tensions continued to increase in September.

September was also rich in central bank pulses. The Bank of England and the European Central Bank have not changed the monetary policy conditions as expected but the Turkish central bank has raised its key interest rate to 24% in a dramatic bid from 17.5% to control inflation and prevent a currency crisis. Following the decision, the Turkish lira started to rise and the Turkish equities closed the month in the black. The Federal Reserve has raised US short term interest rate by 25 basis points to 2-2.25 per cent and further strengthened the chance of another tightening in December, the market gives 85% probability for the next interest rate hike this year.

Until end of September, Italian assets could rise and the Italian yield spreads fell which caused rise in the banking sector. However, by the end of the month the Italy's coalition government agreed on a 2019 deficit at 2.4 percent of GDP compared to the EU's preferred level of less than 2 percent, which caused a significant drop in the Italian risky assets while the Italian 10 year government bond hit 3.4 per cent with almost a 20% increase.

In September the oil could also increase its price, the oil market is currently characterised by constriction of the supply-side: in addition to the expected impact of Iranian sanctions, US oil reserves have significantly fallen while the hurricane Florence has also supported the price of the black gold.

In September, we slightly increased the proportion of the riskier absolute return funds, thus the weight of the Panorama was increased, while the weight of BondMaxx was similarly reduced. Within the Fund's investments, the best month was achieved by MoneyMaxx and BondMaxx, closely followed by Panorama Fund.

ASSET ALLOCATION OF THE FUND ON 09/30/2018
