INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide an alternative solution for those investors who are expecting a decline of the share prices on the Polish Stock Market. In case of declining share prices by its WIG20 short future exposure the fund ensures that the investor will get extra return on his investment. If the fund manager expects that the stock markets will go up than he reduces the option position, but if he sees higher risk in the stock markets than he will buy more put options for the WIG20 Index. Since the capital protection allows the fund manager to buy only limited amount of futures the maximum short exposure of the fund is 100% of the fund's net asset value. Since the fund is a dedicated bearish fund it intends to keep the WIG20 short exposure 20%-40% of net asset value, depends on the strategy of the Fund Manager. To protect the capital, the Fund mainly invests in Polish treasury bills, government bonds and other debt securities. The Fund offers 90% capital protection for the first trading day of the year under special condition. The 90% capital protection is ensured by the investment policy of the Fund, it does not mean a full capital protection.
