Net Asset Value of HUF series:	2,733,895,138 HUF
Net Asset Value per unit:	1.413550 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

Annualized standard deviation of the benchmark's weekly yields:	14.30 %
WAM (Weighted Average Maturity):	0.00 years
WAL (Weighted Average Life):	0.00 years

MARKET SUMMARY:

After the record fall in December, the beginning of the year on stock markets has been favourable for the equity prices. Both developed and emerging markets could increase their value. The Emerging market index and America also showed a 9% rise in the first month of the year, while in US dollar terms, Hungarian equities could also rise by 6%. The rise was mainly due to the decline in the Fed's rate hike and the easing of the US-China trade war. In addition, the longest government shutdown in America's history has ended, after Donald Trump has announced that he will sign a budget for three weeks for government agencies. However, the President continues to insist on building the wall on the Mexican border, if no agreement can be reached, another shutdown may come and even a state of emergency can be announced. The oil price also managed to rebound this year thanks to the declining stocks, easing in trade war and turmoil in Venezuela. Europe is still under pressure because of the uncertainty surrounding Brexit. In mid-January, the Brexit draft was voted down by the British Parliament as expected, while Plan B for further steps (planned by the Prime Minister) was voted on 30th January. Although, after the vote, several Representatives of the Union have indicated that they do not support the proposals. Though Theresa May rejects another referendum, some sources suggest that there is already a draft that would offer three versions for the British population: no-deal, May plan or stay. In our opinion, the postponement of 2-years deadline of Article 50 is the most likely scenario, but uncertainty increases the likelihood of a hard-Brexit output. We think that hard-Brexit is not priced in at all, thus such a negative scenario can bring serious sellers to the market but the convergence of the parties and any agreement may reduce pressure on the British and European equities. The fund achieved good returns in January and performed in line with its reference index. Within the developed markets, the best performance was provided by America and Japan in Dollar terms, while European equities underperformed. In January, we were more active in individual equities, we bought a Japanese videogame developer company, a European bank, and long exposure was opened in many US individual shares.

ASSET ALLOCATION OF THE FUND ON 01/31/2019

Asset type	Weight
