Net Asset Value of institutional series:	14,341,491,240 HUF
Net Asset Value per unit:	1.656698 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Major stock markets continued to rise in March thus the asset class closed the best first quarter since 2012. The strengthening was mostly due to the positive investor sentiment, analysts did not significantly improve their earnings forecasts which also means that shares became more expensive compared to metrics seen at the beginning of the year. At the beginning of the month, equities were under pressure because of the increasing growth fears, weaker US trade deficit and labour market data, however, the trade war optimism and the market-friendly FED have brought a turn. March was a rich month of Central Banks' pulses. The ECB did not change interest rates as expected but announced TLTROIII (the third wave of the longer-term refinancing operation) to provide banks with cheap sources. Moreover, the Hungarian National Bank has also held its interest rate decision-making meeting, where overnight deposit rate was raised by 10 basis points to -0.05% but the Governor of the Hungarian National Bank emphasized that this was a one-off decision, this does not mean a monetary policy turnaround. As a result of the decision, the Forint started to weaken against both developed and regional currencies, which helped to improve the performance of our assets dominated in foreign currencies. However, the Hungarian equity market managed to reach a new historic peak with the leadership of OTP Bank. The Central Banks' measures triggered a decline in yields thus the yield of German 10-year papers fell under zero, while the US three-month and 10-year bond yields (for the first time since the crisis) were inverted. We had a busy month behind us in connection with the Brexit but we did not get closer to the final solution. In March, the May-plan was rejected for the third time, despite the fact that Teresa May offered her resignation in return for the approval. The current final deadline is 12th of April; so far they have reached a consensus on a single issue: exit without agreement must be avoided at all costs. The fund achieved good performance in March, supported mainly by the rise in Developed markets and weakening of the Hungarian currency. During the month, we realized profit on our long Ubisoft, Google positions and half of our Japanese video gaming exposure was also closed, while we entered into long European equity exposure. We believe that European equities are more attractive in terms of pricing and earnings expectations thus we are overweighting them and expecting outperformance within the Developed markets.

ASSET ALLOCATION OF THE FUND ON 03/31/2019

Asset type	Weight
Collective securities	79.75 %
International equities	15.17 %
Current account	4.30 %
