Net Asset Value of HUF series:	7,351,149,709 HUF
Net Asset Value per unit:	1.457144 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Özon Capital Protected Fund.

Aegon ÖzonMaxx Total Return Investment Fund	3.6%
Aegon Emerging Europe Bond Fund	0.0%
<b>Total:</b>	<b>100%</b>

## MARKET SUMMARY:

Major stock markets continued to rise in March thus the asset class closed the best first quarter since 2012. The strengthening was mostly due to the positive investor sentiment, analysts did not significantly improve their earnings forecasts which also means that shares became more expensive compared to metrics seen at the beginning of the year. At the beginning of the month, equities were under pressure because of the increasing growth fears, weaker US trade deficit and labour market data, however, the trade war optimism and the market-friendly FED have brought a turn. March was a rich month of Central Banks' pulses. The ECB did not change interest rates as expected but announced TLTROIII (the third wave of the longer-term refinancing operation) to provide banks with cheap sources. Moreover, the Hungarian National Bank has also held its interest rate decision-making meeting, where overnight deposit rate was raised by 10 basis points to -0.05% but the Governor of the Hungarian National Bank emphasized that this was a one-off decision, this does not mean a monetary policy turnaround. As a result of the decision, the Forint started to weaken against both developed and regional currencies, which helped to improve the performance of our assets dominated in foreign currencies. However, the Hungarian equity market managed to reach a new historic peak with the leadership of OTP Bank. The Central Banks' measures triggered a decline in yields thus the yield of German 10-year papers fell under zero, while the US three-month and 10-year bond yields (for the first time since the crisis) were inverted. We had a busy month behind us in connection with the Brexit but we did not get closer to the final solution. In March, the May-plan was rejected for the third time, despite the fact that Theresa May offered her resignation in return for the approval. The current final deadline is 12th of April; so far they have reached a consensus on a single issue: exit without agreement must be avoided at all costs. The fund achieved good performance in March as all of the portfolio's investments gained positive return. Alfa, Maraton and MoneyMaxx contributed the most to performance.

## ASSET ALLOCATION OF THE FUND ON 03/31/2019
