Currency:	EUR
Total Net Asset Value of the whole Fund:	4,728,643 EUR
Net Asset Value of EUR series:	832,032 EUR
Net Asset Value per unit:	0.009384 EUR

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to benefit from long term, global megatrends. These trends include demographic changes (aging society, emerging markets), efficiency improvements due to depletion of scarce resources (renewable resources, energy efficiency), urbanization, or even technical developments and innovations. To achieving the main objectives, the Fund primarily invests in exchange traded funds, secondly in open-end mutual funds. Megatrends are long term changes that will permanently and significantly alter our social and economic environment. The Fund wishes to invest in companies and sectors likely to benefit from these trends. Thanks to its characteristic, the Fund mainly holds sector and thematic ETFs and mutual funds. Megatrends are very long-term, generally global trends, which are spanning economic cycles. Therefore the Fund invests in global markets without any geographical specification. As the Funds profit from very long term trends and exposed heavily to equity markets, we recommend the Fund for long term, risk seeking investors. The type of the Fund is fund of funds, which, according to their investment policy, have to invest in at least 80% of their assets into ETFs and mutual funds. At the same time, the maximum exposure of each fund is not exceeding 20% of their total assets. The Fund only invests in instruments with total expense ratio below 2.5% and intent to maintain the average expense ratio below 1%.

Annualized standard deviation of the benchmark's weekly yields:	14.06 %
WAM (Weighted Average Maturity):	0.00 years
WAL (Weighted Average Life):	0.00 years

MARKET SUMMARY:

Main equity indices started the new quarter with increase thanks to the positive developments surrounding the trade negotiations and the better-than-expected Chinese data. Due to several better-than-foreseen corporate reports and positive investor sentiment, the S&P 500 and the Nasdaq Composite Index managed to reach a new absolute peak in April. The rise was mainly driven by the positive sentiment, analysts did not significantly improve their earnings forecasts which also means that shares became more expensive. Market participants were already pricing the end of the trade war as all of the news was foreshadowing that the final agreement is coming. This positive mood was broken by Trump at the beginning of May. He announced that tariffs on \$200 billion of Chinese imports will be increased to 25 percent from 10 percent and another \$325 billion in goods will "shortly" be subject to tariffs. The US President's rhetoric caused drop in equity markets; the Chinese A-shares has almost lost 6 percent in one day. Oil prices continued to climb up in April after growth fears eased and the US government was projecting a complete abolition of Iranian oil exports. The growth was once again interrupted by the US President, who called on OPEC countries to increase their production thus the oil began to make a serious correction at the end of the month. However, positive data have been published on the growth of the world's largest economy, the US economy expanded by 3.2 percent in the first quarter of the year, far ahead of the previous 2.2 percent and expected 2.5 percent. This data also supported the strengthening of Dollar which showed a relative strength compared to both developed and emerging market currencies thus the EURUSD broke below the 1.12 level that used to be a resistance. We got also information about the growth of the Chinese economy, the world's second-largest economy grew by 6.4 percent in the first quarter. Since the expiration of the Brexit deadline to October, we have received a little less impulse on this front, although the British political chaos has not cleared up. In contrast to expectations, no significant progress was made in the negotiation of the bipartisan agreement between Theresa May and Jeremy Corbyn. The fund achieved good performance in April but somewhat underperformed due to weaker performance of health care, biotech and medical instrument manufacturing companies. In April, we took advantage of the smaller correction in the cannabis sector thus our exposure was increased, moreover a long position in an American medical instrument manufacturing company was also opened. The IT, European insurance sector and robotics related investments were the main contributors to the positive performance last month.

ASSET ALLOCATION OF THE FUND ON 04/30/2019

Asset type	Weight
