Net Asset Value of HUF series:	1,094,656,085 HUF
Net Asset Value per unit:	1.648265 HUF

INVESTMENT POLICY OF THE FUND:

The Fund invests most of its available funds in assets with a lower risk profile, which means bonds issued or guaranteed by states (including their debt management agencies) that have a credit rating, which is equal or higher than the rating of Hungary, quasi sovereign companies[1], national banks, supranational entities. It is allowed for the Fund to hold deposits, cash or invest in REPO and reverse REPO agreements. Allowed duration limit is 3 years for the whole Fund, while the duration limit for individual bonds is 10 years. In case of bonds denominated in other currencies than HUF, the portfolio manager is aiming for a full FX hedge, deviation from this is only allowed as a part of the riskier asset category. The Fund is permitted to invest in riskier assets to a limited extent: domestic and foreign equities, equity indices, bonds with a higher risk profile, currencies, commodities and collective investment vehicles on spot and futures markets. Long and short trades are both permitted. In case of pair trades[2] the gross extent of the risky assets may reach 10 % of the NAV of the Fund. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due diligence, based on its own judgement and decisions while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the Fund's resources, and the weights of the various investments within the portfolio, with a view to ensure that the Fund - in line with our expectations regarding future risks and returns - achieves its objective in the long term. Reference index of the Fund: 100% RMAX index (Bloomberg ticker: MAXRMAX Index) + 0,5%

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	0.76 %
Annualized standard deviation of the benchmark's weekly yields:	0.21 %
WAM (Weighted Average Maturity):	0.39 years
WAL (Weighted Average Life):	0.62 years

MARKET SUMMARY:

At the start of the month we closed our EURUSD short position as the 1.12 technical level was reached. The HUF looked vulnerable due to the overly dovish central bank but we were stopped out of our long EURHUF position as the currency pair fell from the 200dma 322 level and breached the 320 level as well. Based on market momentum we increased the Eurostoxx exposure of the fund by 1% and took profit on the position later as we felt that market sentiment can be dented by the IMF's latest cut in the global growth forecasts, renewed tensions about the Italian budget deficit targets and with auto tariffs still not off the table. Not to chase the rally, we picked an underperforming equity market as our new investment target. The Mexican economy shows some improvement, and the market pricing reflects political risks after the change in leadership. The new president tried to calm markets though and remains committed to fiscal stability which might improve sentiment. We bought 1% of Mexican equities which we had to stop out as EM sentiment deteriorated.

ASSET ALLOCATION OF THE FUND ON 04/30/2019
