Net Asset Value of HUF series:	7,372,193,199 HUF
Net Asset Value per unit:	1.460597 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Özon Capital Protected Fund.

Aegon ÖzonMaxx Total Return Investment Fund	3.6%
Aegon Emerging Europe Bond Fund	0.0%
Total:	100%

MARKET SUMMARY:

Main equity indices started the new quarter with increase thanks to the positive developments surrounding the trade negotiations and the better-than-expected Chinese data. Due to several better-than-foreseen corporate reports and positive investor sentiment, the S&P 500 and the Nasdaq Composite Index managed to reach a new absolute peak in April. The rise was mainly driven by the positive sentiment, analysts did not significantly improve their earnings forecasts which also means that shares became more expensive. Market participants were already pricing the end of the trade war as all of the news was foreshadowing that the final agreement is coming. This positive mood was broken by Trump at the beginning of May. He announced that tariffs on \$200 billion of Chinese imports will be increased to 25 percent from 10 percent and another \$325 billion in goods will "shortly" be subject to tariffs. The US President's rhetoric caused drop in equity markets; the Chinese A-shares has almost lost 6 percent in one day. Oil prices continued to climb up in April after growth fears eased and the US government was projecting a complete abolition of Iranian oil exports. The growth was once again interrupted by the US President, who called on OPEC countries to increase their production thus the oil began to make a serious correction at the end of the month. However, positive data have been published on the growth of the world's largest economy, the US economy expanded by 3.2 percent in the first quarter of the year, far ahead of the previous 2.2 percent and expected 2.5 percent. This data also supported the strengthening of Dollar which showed a relative strength compared to both developed and emerging market currencies thus the EURUSD broke below the 1.12 level that used to be a resistance. We got also information about the growth of the Chinese economy, the world's second-largest economy grew by 6.4 percent in the first quarter. Since the expiration of the Brexit deadline to October, we have received a little less impulse on this front, although the British political chaos has not cleared up. In contrast to expectations, no significant progress was made in the negotiation of the bipartisan agreement between Theresa May and Jeremy Corbyn. The fund achieved good performance in April as all of the portfolio's investments gained positive return. Alfa and Maraton contributed the most to performance last month.

ASSET ALLOCATION OF THE FUND ON 04/30/2019

Asset type	Weight
