Net Asset Value of institutional series:	1,220,459,243 HUF
Net Asset Value per unit:	1.125549 HUF

## INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

## MARKET SUMMARY:

The market remained extremely strong in July. Although core market yields did not fall further, core central banks remain dovish, appetite for yield and duration remains high across the world. ECB may start its new asset purchase program in the fall, which is supportive for spreads in general. The market remained extremely strong in July. Although core market yields did not fall further, core central banks remain dovish, appetite for yield and duration remains high across the world. ECB may start its new asset purchase program in the fall, which is supportive for spreads in general. Local news remained in the background, but the good budget execution and declining wholesale issuance needs amid the success of the new retail bond are worth mentioning. Yields fell 35 bps in the long end.
