Start: 09/01/2016

Currency: CZK

Total Net Asset Value of the whole Fund: 16,977,564,747 HUF

Net Asset Value of CZK series: 123,903 CZK

Net Asset Value per unit: 1.239027 CZK

## INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

Annualized standard deviation of the benchmark's weekly yields: 14.25 %

WAM (Weighted Average Maturity): 0.00 years

WAL (Weighted Average Life): 0.00 years

## MARKET SUMMARY:

July picked it up where June ended. The markets celebrated the truce between President Trump and Xi Jinping by making new all-time highs. The two leaders agreed to continue the trade negotiation on the highest government level. The most important news out from Europe is that Boris Johnson is the new prime minister of England. He is well known as a hardcore "hard-Brexit-er". It will be interesting to watch what will he do, because now he has to deliver what he promised during his campaign. In other words, he had better eat, what he cooked for himself. The macroeconomic picture is mixed. The U.S. data still shows a robust economy, while the Chinese and European data shows a slowing economy that is potentially heading into a recession. Probably that is why Mario Draghi said in his farewell speech that he would do whatever necessary to jump-start the European economy and all means will be justified. After the speech, the German 10 year government yield went to a new all-time low to -51bps. The fund had a positive month and over performed its benchmark. The over performance was made possible by the overweight in the Hungarian and Austrian equities. We keep the Polish weight at neutral level, but within the position we keep the midcap companies at overweight. Overall, the fund is overweight on equity level, on sector level the telecommunication and real estate sector overweight while energy and banking underweight. On individual level, we sold all our OMV position because of the potential American sanctions, and we realized profit in OTP.

## ASSET ALLOCATION OF THE FUND ON 07/31/2019
