INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The political uncertainty is still a major factor in today's investment environment. The "Boss", meaning Donald Trump, is not kidding around, he will raise the tariffs by an additional \$300 billion on Chinese imports if the two leaders will not find a common ground on the G-20 meetings - said Wilbur Ross the U.S. Secretary of Commerce. The macroeconomic indicators are still weakening. The Chinese Caixin PM index fell to 52,7 from 54,4 and its future expectation sub index fell to a 7 year low. Based on this, the Chinese retail consumption is slowing too, while the inflation YoY is reaching 2,7%. The U.S. economy is showing signs of a slowdown too. Although the unemployment rate is still historically very low at 3,6%, but the change in the monthly non-farm payrolls was 75,000 instead of the expected 175,000, and the U.S. PMI came in at 50,5 level which is slightly above recession levels. The German 10 year bond yield made a new all-time low at -31bp, while the Swiss 30 year yield went negative and the 50 year yield is close to 0. Although the fund had a positive month, it still underperformed the benchmark. The underperformance was caused by the underweight in Polish and the overweight in Austrian equities. We cut the down the Polish underweight thru the month but the position still hasn't reached the neutral level. Based on the sector performances the telecommunication, retail and the material sector performed well, while the oil sector performed poorly in spite of higher oil prices. On the country level Poland was the best performer and Hungary was the worst.

ASSET ALLOCATION OF THE FUND ON 06/30/2019

| Asset type | Weight |
