Total Net Asset Value of the whole Fund:	100,184,053 PLN
Net Asset Value of PLN series:	8,799,856 PLN
Net Asset Value per unit:	0.995626 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey, although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

Annualized standard deviation of the benchmark's weekly yields:	8.73 %
WAM (Weighted Average Maturity):	0.00 years
WAL (Weighted Average Life):	0.00 years

MARKET SUMMARY:

The political uncertainty is still a major factor in today's investment environment. The "Boss", meaning Donald Trump, is not kidding around, he will raise the tariffs by an additional \$300 billion on Chinese imports if the two leaders will not find a common ground on the G-20 meetings - said Wilbur Ross the U.S. Secretary of Commerce. The macroeconomic indicators are still weakening. The Chinese Caixin PMI index fell to 52,7 from 54,4 and its future expectation sub index fell to a 7 year low. Based on this, the Chinese retail consumption is slowing too, while the inflation YoY is reaching 2,7%. The U.S. economy is showing signs of a slowdown too. Although the unemployment rate is still historically very low at 3,6%, but the change in the monthly non-farm payrolls was 75,000 instead of the expected 175,000, and the U.S. PMI came in at 50,5 level which is slightly above recession levels. The German 10 year bond yield made a new all-time low at -31bp, while the Swiss 30 year yield went negative and the 50 year yield is close to 0. The fund performed well in the past month and over performed its benchmark. The best performers in Central and Eastern Europe were the Polish telecommunication stocks, because they were able to increase prices without inducing a price war. Because of the outcome of the G-20 meeting and the friendly central bank environment we believe there is still room for upside in the near future. With this in mind we over leveraged the fund by 10% with midcap equities. Also noteworthy that although crude oil traded constantly above \$55, the oil sector under performed last month.

ASSET ALLOCATION OF THE FUND ON 06/30/2019

Asset type	Weight
