Total Net Asset Value of the whole Fund:	21,492,784,945 HUF
Net Asset Value of CZK series:	CZK
Net Asset Value per unit:	1.070491 CZK

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achieve the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Moreover, the Fund can trade on the option market. The portfolio of the Fund is separated into three classes according to their investment objective: Instruments of the first class consist of long positions of long term, fundamentally undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short positions on the futures markets. These positions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%.

Risk and Reward Profile:

MARKET SUMMARY:

July picked it up where June ended. The markets celebrated the truce between President Trump and Xi Jinping by making new all-time highs. The two leaders agreed to continue the trade negotiation on the highest government level. The most important news out from Europe is that Boris Johnson is the new prime minister of England. He is well known as a hardcore "hard-Brexit-er". It will be interesting to watch what will he do, because now he has to deliver what he promised during his campaign. In other words, he had better eat, what he cooked for himself. The macroeconomic picture is mixed. The U.S. data still shows a robust economy, while the Chinese and European data shows a slowing economy that is potentially heading into a recession. Probably that is why Mario Draghi said in his farewell speech that he would do whatever necessary to jump-start the European economy and all means will be justified. After the speech, the German 10 year government yield went to a new all-time low to -51bps. The fund had a positive month and over performed the benchmark too. The majority of the performance came from the bonds side but the equity had contributed too. On a sector level the regional bank and real estate sector over performed, while the polish and cannabis positions had a negative effect on the performance. The fund had positions in OTP during the month but these were tactical in nature, and we realized profits in the Famur position. The fund was fully invested during July so the risk level was high. Part of the US dollar exposure is hedged, and during the second part of the month we hedged the Euro exposure by 100%.

ASSET ALLOCATION OF THE FUND ON 07/31/2019
