## INVESTMENT POLCY OFTHEFUND:

The objective of the Fund is to benefit from long term, global megatrends. These trends include demographical changes (aging society, emerging markets), efficiency improvements due to depletion of scarce resources (renewable resources, energy efficiency), urbanization, or even technical developments and innovations. To achieving the main objectives, the Fund primary invests in exchange traded funds, secondly in open-end mutual funds. Megatrends are long term changes that will permanently and significantly alter our social and economic environment. The Fund wishes to invest in companies and sectors likely to benefit from these trends. Thanks to its characteristic, the Fund mainly holds sector and thematic ETFs and mutual funds. Megatrends are very long-term, generally global trends, which are spanning economic cycles. Therefore the Fund invests in global markets without any geographical specification. As the Funds profit from very long term trends and exposed heavily to equity markets, we recommend the Fund for long term, risk seeking investors. The type of the Fund is fund of funds, which, according to their investment policy, have to invest in at least $80 \%$ of their assets into ETFs and mutual funds. At the same time, the maximum exposure of each fund is not exceeding $20 \%$ of their total assets. The Fund only invests in instruments with total expense ratio below $2.5 \%$ and intent to maintain the average expense ratio below $1 \%$.

## MARKET SUMMARY:

The political uncertainty is still a major factor in today`s investment environment. The "Boss", meaning Donald Trump, is not kidding around, he will raise the tariffs by an additional $\$ 300$ billion on Chinese imports if the two leaders will not find a common ground on the G-20 meetings - said Wilbur Ross the U.S. Secretary of Commerce. The macroeconomic indicators are still weakening. The Chinese Caixin PMI index fell to 52,7 from 54,4 and its future expectation sub index fell to a 7 year low. Based on this, the Chinese retail consumption is slowing too, while the inflation YoY is reaching 2,7\%. The U.S. economy is showing signs of a slowdown too. Although the unemployment rate is still historically very low at $3,6 \%$, but the change in the monthly non-farm payrolls was 75,000 instead of the expected 175,000 , and the U.S. PMI came in at 50,5 level which is slightly above recession levels. The German 10 year bond yield made a new all-time low at -31 bp , while the Swiss 30 year yield went negative and the 50 year yield is close to 0 . The fund performed well in the past month thanks to general market optimism and good stock picking. Because the outcome of the G-20 meeting and the friendly central bank attitude we think the market can go up even further in the near future. The best performing sector was the IT sector while the worst was the cannabis. We think this is a cyclical sell off, and we are using this weakness to add more exposure to this sector. Last month we established new positions in the Infrastructure, Millennials ( Y generation) and Water and Waste management sector.
