Total Net Asset Value of the whole Fund:	18,387,135,246 HUF
Net Asset Value of EUR series:	622,213 EUR
Net Asset Value per unit:	1.219322 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

July picked it up where June ended. The markets celebrated the truce between President Trump and Xi Jinping by making new all-time highs. The two leaders agreed to continue the trade negotiation on the highest government level. The most important news out from Europe is that Boris Johnson is the new prime minister of England. He is well known as a hardcore "hard-Brexit-er". It will be interesting to watch what will he do, because now he has to deliver what he promised during his campaign. In other words, he had better eat, what he cooked for himself. The macroeconomic picture is mixed. The U.S. data still shows a robust economy, while the Chinese and European data shows a slowing economy that is potentially heading into a recession. Probably that is why Mario Draghi said in his farewell speech that he would do whatever necessary to jump-start the European economy and all means will be justified. After the speech, the German 10 year government yield went to a new all-time low to -51bps. Although the fund performed well in the last month, thanks to the overall market rally and excellent stock picking, it still slightly underperformed its benchmark. This caused mainly by the European overweight and the US underweight. We are still holding previously established banking sector and individual names in the European auto sector positions. We sold our medical cannabis position during the month.

ASSET ALLOCATION OF THE FUND ON 07/31/2019
