Net Asset Value of HUF series:	7,350,309,408 HUF
Net Asset Value per unit:	2.280560 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, very low-risk investment vehicle, but to offer investors better returns than bank deposits. The portfolio elements are selected in accordance with these principles. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills distributed by the State Debt Management Centre (ÁKK), and bonds issued by the National Bank of Hungary. The average duration of the assets in the portfolio is 6 months, and the average remaining life of the assets may not exceed 12 months. The fund is low-risk, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to ensure a higher return than government securities. In the case of floating rate, forint denominated debt securities the average duration is equal to the number of days remaining until the next interest payment day. The fund may also invest its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Money Market Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

Last month's money market turbulence repeated itself in June. Mid-month, short tenor interbank and FX-implied rates jumped, liquidity conditions in the banking system were now also negatively affected by the high sales figures of the new retail bond. The central bank had to conduct an emergency liquidity providing tender to ease stress. This, and large bond maturities later in the month normalised the situation again and yields returned to normal levels.
