Net Asset Value of PLN series:	24,870,848 PLN
Net Asset Value per unit:	1.357519 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Russian equity market, and to profit from Russia's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund's portfolio primarily consists of the publicly issued shares of foreign companies. The main investment targets are the stock exchange-traded shares of companies that maintain an active presence in Russia or the former CIS states, or which generate the bulk of their revenues in these countries. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights, within the portfolio, of shares traded in the Russian market are determined with a view to ensuring that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

July picked it up where June ended. The markets celebrated the truce between President Trump and Xi Jinping by making new all-time highs. The two leaders agreed to continue the trade negotiation on the highest government level. The most important news out from Europe is that Boris Johnson is the new prime minister of England. He is well known as a hardcore "hard-Brexit-er". It will be interesting to watch what will he do, because now he has to deliver what he promised during his campaign. In other words, he had better eat, what he cooked for himself. The macroeconomic picture is mixed. The U.S. data still shows a robust economy, while the Chinese and European data shows a slowing economy that is potentially heading into a recession. Probably that is why Mario Draghi said in his farewell speech that he would do whatever necessary to jump-start the European economy and all means will be justified. After the speech, the German 10 year government yield went to a new all-time low to -51bps. The fund had a positive month and over performed its benchmark too, thanks to the overall market rally and good stock picking. The macro data shows a mixed picture about the Russian economy. The GDP is still good, the currency reserve is still growing, but the PMI went below 50, which makes us cautious. Based on these observations the fund is not invested 100% because we are expecting a pullback.

ASSET ALLOCATION OF THE FUND ON 07/31/2019

Asset type	Weight
International equities	96.97 %
Receivables	1.90 %
Current account	1.32 %
Liabilities	-0.18 %
