INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

MARKET SUMMARY:

The political uncertainty is still a major factor in today's investment environment. The "Boss", meaning Donald Trump, is not kidding around, he will raise the tariffs by an additional \$300 billion on Chinese imports if the two leaders will not find a common ground on the G-20 meetings - said Wilbur Ross the U.S. Secretary of Commerce. The macroeconomic indicators are still weakening. The Chinese Caixin PMI index fell to 52,7 from 54,4 and its future expectation sub index fell to a 7 year low. Based on this, the Chinese retail consumption is slowing too, while the inflation YoY is reaching 2,7%. The U.S. economy is showing signs of a slowdown too. Although the unemployment rate is still historically very low at 3,6%, but the change in the monthly non-farm payrolls was 75,000 instead of the expected 175,000, and the U.S. PM came in at 50,5 level which is slightly above recession levels. The German 10 year bond yield made a new all-time low at -31bp, while the Swiss 30 year yield went negative and the 50 year yield is close to 0. The fund performed well in the past month thanks to general market optimism and good stock picking. Because outcome of the G-20 meeting and the friendly central bank attitude we think the market can go up even further in the near future. Among the funds, Alfa and Maraton were the best performers, but all the other funds had a positive overall effect on the performance.
