Net Asset Value of HUF series:	7,249,983,622 HUF
Net Asset Value per unit:	1.475156 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Aegon OzonMaxx Total Return Investment Fund	3.5%
Aegon Emerging Europe Bond Fund	0.0%
Total:	100%

MARKET SUMMARY:

July picked it up where June ended. The markets celebrated the truce between President Trump and Xi Jinping by making new all-time highs. The two leaders agreed to continue the trade negotiation on the highest government level. The most important news out from Europe is that Boris Johnson is the new prime minister of England. He is well known as a hardcore "hard-Brexit-er". It will be interesting to watch what will he do, because now he has to deliver what he promised during his campaign. In other words, he had better eat, what he cooked for himself. The macroeconomic picture is mixed. The U.S. data still shows a robust economy, while the Chinese and European data shows a slowing economy that is potentially heading into a recession. Probably that is why Mario Draghi said in his farewell speech that he would do whatever necessary to jump-start the European economy and all means will be justified. After the speech, the German 10 year government yield went to a new all-time low to -51bps. The fund had a positive month thanks to the overall market rally, and also because our absolute and total return funds performed well. Among the funds, Alfa and Maraton had the most added value, but other than the OzonMaxx all the other funds contributed to the return.

ASSET ALLOCATION OF THE FUND ON 07/31/2019

Asset type	Weight
