Net Asset Value of PLN series:	10,359,746 PLN
Net Asset Value per unit:	1.100384 PLN

### INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achieve the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Moreover, the Fund can trade on the option market. The portfolio of the Fund is separated into three classes according to their investment objective: Instruments of the first class consist of long positions of long term, fundamentally undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short positions on the futures markets. These positions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%.

Annualized standard deviation of the fund's weekly yields: 4.52 %  
Annualized standard deviation of the benchmark's weekly yields: 0.16 %

### MARKET SUMMARY:

Donald Trump, the president of the United States in his love me-love me not game august got the latter one. As Xi Jinping was his best friend in July, he became his worst enemy by August. Lately, it is very hard to follow the U.S. president's controversial reasoning, and his inconsistent thinking has an impact on the financial markets. In the last month, there were 2 days when the S&P 500 index fell more than 1%, and 2 days when it fell by more than 2%. It's a miracle that the index closed down the month by only 1,82%. We don't know what the president's true intention is, but it's not helping the investors.

The trade war has multiple aspects. Analysts thought that Trump wants to force the FED to cut rates, and using the trade war as a tool to achieve this goal. But the FED resisted the political pressure, and cut the Fed Fund Rate by only 25bp. Moreover, Jay Powell the chairman of the FED, declared that the only the change in economic data will force the central bank to change its interest rate policy. So far the FED thinks that this is only a mid-cycle slowdown which doesn't justify more rate cuts at this time. Trump didn't like what he heard, and his next tweet he stated that he doesn't know who is the greater enemy of the U.S.: Xi the Chinese president or Powell FED president.

The fund had a negative performance in August and under performed its benchmark too. The Turkish and Polish exposure that hurt the fund the most. We realized profits in the HGB position and decreased the duration on the other bond positions. Although we are still very positive on the gaming sector, we closed the Capcom position with substantial profits. The fund profited from the weakening HUF, and the risk level is still high in the fund. We increased the European exposure, and bought those stock that suffered a sell off because of the MSCI re-balancing.
