## INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

## MARKET SUMMARY:

Market developments were dominated by risk aversion in August. Trade war tensions grew, safe haven assets rallied. The Fed did not capitulate yet to the pressure from the president, they only cut 25 bps and some hawkish comments reinforced the bad mood and drove the USD stronger. Fixed income instruments performed well amid falling core yields, we also took profit on short iron ore and S&P500 positions. We increased the long PLNHUF trade in the fund.
