Net Asset Value of P series:	45,338,197 PLN
Net Asset Value per unit:	1.190035 PLN

## INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

## MARKET SUMMARY:

The trend has changed in September from the earlier months, the Polish yields began to rise and the yield curve began to steepen. Although the 3 year yield remained almost the same, the 5 year rose by 8-, and the 10 year by 15 basis points by the end of the month. Moving on with economic data, according to market expectations, the GDP in 2019 will be 4,3%, in 2020 3,6%, and in 2021 3,1%. Also the third quarter's forecast for the current year was changed from 4,3% to 4,2% and fourth quarter's forecast was kept unchanged. The inflation rate fell back a little from the August's 2,9% level to 2,6% in September, which was slightly below the market expectation of 2,75%. Polish inflation slowed for the first time since January. The Purchasing Managers' Index fell from August's 48,8 level to 47,8, which is slightly under market expectations. This is the 11th month in a row that the index is below the 50 level. New orders also declined at the fastest in the last 10 years. Although Industrial output grew in July by 5,8%, it fell in August 1,3% YoY. This was way below market expectations. The main culprit was the auto industry. Regarding the government budget balance, the cumulative deficit for the first 8 months was 1980,7 million PLN, which means that the monthly surplus was 2802,2 million PLN. In September, the government made an announcement that they will double the minimum wage by 2024, in order to increase living standards in Poland. This can have a substantial effect on inflation, wage rise, and consumption.

## ASSET ALLOCATION OF THE FUND ON 09/30/2019
