Net Asset Value of HUF series:	3,053,780,792 HUF
Net Asset Value per unit:	1.658335 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The U.S. Federal Reserve Bank cut its benchmark rate by 25 basis point in September, and based on future data it may cut even more. It's mentionable, that the board was very divided about the rate cut. They were divided almost evenly, but 2 governors wanted to raise the rates. The 10 year yield sunk to a 3 year low, and the 30 year yield fell below 2%, which is the lowest ever recorded. The ECB also cut rates from -40 basis points to -50, and they restarted the asset purchase program in the amount of 20 billion euros per month. When the news came out the EURUSD cross rate went below 1,10 which was a 2 year low. In Hungary, the national bank kept the benchmark yield at 0,9% and raised the interbank liquidity amount to 100 billion HUF for the next quarter. This didn't bode well for the forint, the EURHUF rate went above 336, which was a new all time high. The fund had a good return in September and over performed its benchmark, thanks to overweight positions in the European and banks stocks. The bank position was closed last month. We still believe that because of valuation and over positioning, the European equities will outperform the American equities. Also the Japanese market performed well last month. Top down approach and sector allocation style dominated last month. The bank index futures positions were closed out, but the fund is over weight in individual bank and auto stocks compared to the benchmark.

ASSET ALLOCATION OF THE FUND ON 09/30/2019

Asset type	Weight
Collective securities	73.06 %
International equities	20.49 %
T-bills	0.86 %
