## MARKET SUMMARY:

The U.S. Federal Reserve Bank cut its benchmark rate by 25 basis point in September, and based on future data it may cut even more. It's mentionable, that the board was very divided about the rate cut. They were divided almost evenly, but 2 governors wanted to raise the rates. The 10 year yield sunk to a 3 year low, and the 30 year yield fell below 2%, which is the lowest ever recorded. The ECB also cut rates from -40 basis points to -50, and they restarted the asset purchase program in the amount of 20 billion euros per month. When the news came out the EURUSD cross rate went below 1,10 which was a 2 year low. In Hungary, the national bank kept the benchmark yield at 0,9% and raised the interbank liquidity amount to 100 billion HUF for the next quarter. This didn't bode well for the forint, the EURHUF rate went above 336, which was a new all time high. The fund performed well in September, but we decreased risk by the end of the month both market and individual equity level. The fund realized profits by selling its DAX, Eurostoxx, European bank, Raiffeisen, and Lukoil positions. At the end of the month the fund bought gold as a hedge.
