Net Asset Value of institutional series:	2,945,361,369 HUF
Net Asset Value per unit:	3.305898 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Russian equity market, and to profit from Russia's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund's portfolio primarily consists of the publicly issued shares of foreign companies. The main investment targets are the stock exchange-traded shares of companies that maintain an active presence in Russia or the former CIS states, or which generate the bulk of their revenues in these countries. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights, within the portfolio, of shares traded in the Russian market are determined with a view to ensuring that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The U.S. Federal Reserve Bank cut its benchmark rate by 25 basis point in September, and based on future data it may cut even more. It's mentionable, that the board was very divided about the rate cut. They were divided almost evenly, but 2 governors wanted to raise the rates. The 10 year yield sunk to a 3 year low, and the 30 year yield fell below 2%, which is the lowest ever recorded. The ECB also cut rates from -40 basis points to -50, and they restarted the asset purchase program in the amount of 20 billion euros per month. When the news came out the EURUSD cross rate went below 1,10 which was a 2 year low. In Hungary, the national bank kept the benchmark yield at 0,9% and raised the interbank liquidity amount to 100 billion HUF for the next quarter. This didn't bode well for the forint, the EURHUF rate went above 336, which was a new all time high. The fund had a positive return in September, thanks to the strengthening ruble and the good sector picking. We overweighted the oil and bank sector compared to the benchmark, and the under weighted telecommunication sector had a positive effect too. Some off benchmark position had a negative effect on the fund's performance. In the oil sector the fund went from the neutral level to overweight.

ASSET ALLOCATION OF THE FUND ON 09/30/2019

Asset type	Weight
International equities	93.95 %
