Total Net Asset Value of the whole Fund:	7,744,824 EUR
Net Asset Value of HUF series:	1,546,565,079 HUF
Net Asset Value per unit:	1.279507 HUF

INVESTMENT POLICY OF THE FUND:

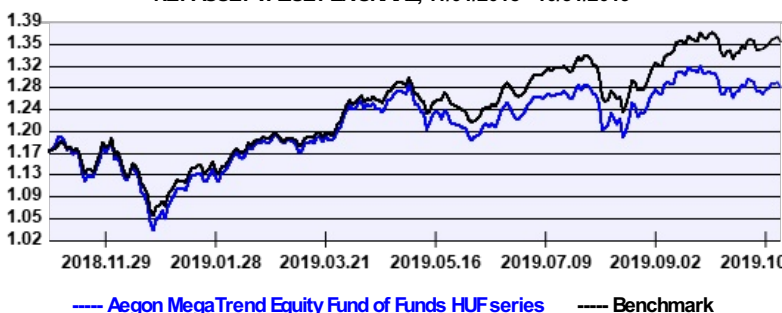

The objective of the Fund is to benefit from long term, global megatrends. These trends include demographical changes (aging society, emerging markets), efficiency improvements due to depletion of scarce resources (renewable resources, energy efficiency), urbanization, or even technical developments and innovations. To achieving the main objectives, the Fund primary invests in exchange traded funds, secondly in open-end mutual funds. Megatrends are long term changes that will permanently and significantly alter our social and economic environment. The Fund wishes to invest in companies and sectors likely to benefit from these trends. Thanks to its characteristic, the Fund mainly holds sector and thematic ETFs and mutual funds. Megatrends are very long-term, generally global trends, which are spanning economic cycles. Therefore the Fund invests in global markets without any geographical specification. As the Funds profit from very long term trends and exposed heavily to equity markets, we recommend the Fund for long term, risk seeking investors. The type of the Fund is fund of funds, which, according to their investment policy, have to invest in at least 80% of their assets into ETFs and mutual funds. At the same time, the maximum exposure of each fund is not exceeding 20% of their total assets. The Fund only invests in instruments with total expense ratio below 2.5% and intent to maintain the average expense ratio below 1%.

MARKET SUMMARY:

For the first time in months, not the American-Chinese trade war was the centerpiece in the investors' minds. It seems that the parties agreed in a multi-phase agreement, and soon they will finalize the first phase, provided the talks will continue. The markets liked what they heard, and the major American indices went to new all-time highs. The FED cut the Fed fund rates by 25 basis points to a new range of 1,50-1,75. The macro economic data shows a mixed picture. The unemployment rate is 3,5%, the inflation rate is at 1,7%, but the ISM is still below the critical 50 level. The European economy is still struggling. So far the 2019 GDP forecast is 0,5%, and the 2020 GDP forecast is lowered to 1,1%. The German manufacturing index fell back to 48,7, which is the lowest level since 2012, the German export dropped by 1,8%, and the PM is under the critical 50 level, at 45,7. There will be a parliamentary election in England, and the result of this election will have a huge influence on January 31st exit date. In Hungary, the forint strengthened a bit against the euro, and went below the psychologically important 330 level. Since the macro factors hasn't changed, and the central bank is not bothered by the weak forint, we view this rally in the forint as technical in nature. The fund had a negative performance last month and underperformed its benchmark. Breaking down to sectors, the insurance, defense and the cannabis sectors were the worst performers, while the emerging market tech and internet sectors were the best. The fund's equity allocation unchanged at 100%.

ASSET ALLOCATION OF THE FUND ON 10/31/2019
