INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

MARKET SUMMARY:

Risk appetite returned to markets once again in October as expectations that the US and China were edging towards agreeing on "phase one" of their trade deal, earnings season broadly bettering expectations, the Fed announcing that it would resume securities purchases to grow its balance sheet and even the latest twist in Brexit developments all combining to help to boost sentiment. Core market yields increased significantly from the troughs, equities rallied while EM bond spreads tightened. In the fund we decreased Polish interest rate risk while increasing local bond exposure. We remain defensive as we remain sceptical about a quick resolution of US-China trade talks. We took profit on the long BRL position of the fund.
