Net Asset Value of HUF series:	7,262,223,198 HUF
Net Asset Value per unit:	1.507021 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Annualized standard deviation of the benchmark's weekly yields:	0.00 %
WAM (Weighted Average Maturity):	0.00 years
WAL (Weighted Average Life):	0.00 years

## MARKET SUMMARY:

The Chinese-American trade war has less and less effect on the investors' decisions, and you can see this how the markets move after President Trump's tweets. In the past few months both sides communicated how the trade talks were progressing, but now the markets want to hear some concrete facts, because everything is else just "noise". This is good news for investors because they can rule out all the political uncertainty from their decisions making process. Formal New York mayor announced that he is joining the race to be the next president of the U.S.A Bloomberg's entry into the race will change the odds, because unlike Trump he is the founder-owner of the well-known international company and he feels at home in the political arena. On his congressional hearing, Jay Powell Fed chairman announced, that slow growth, low inflation, low interest rates are the new norm, and he excluded the possibility of the negative rates in the U.S. He thinks that the monetary policy is well positioned to keep the economy growing, and the FED is committed to the 2% inflation target. The European economy is still struggling, but you can see the light at the end of the tunnel. The Eurozone's and Europe's biggest economy manufacturing PMI went higher, but it is still below the critical 50 level. If we take into consideration last month's all macro-economic data, then we might conclude that the European economy has reached its bottom. In Hungary, the Hungarian National Bank hasn't changed its base rate, moreover they indicated in their communique that they are easing some of their monetary conditions. This had effect on the EURHUF cross rate, it went to 337, which was a new all-time low. It is also mentionable that the Hungarian stock index, the BUX, went to new all-time high, and growing number of foreign investment houses are issuing buy recommendations on Hungarian equities. The fund had a positive return in November, and all its investments had a positive return. The biggest yields has been achieved by the equity focused absolute and total return funds, such as the Alfa, Maraton, and Panoráma.

## ASSET ALLOCATION OF THE FUND ON 11/30/2019
