Net Asset Value of CZK series:	318,299 CZK
Net Asset Value per unit:	1.060995 CZK

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The fund is decidedly high-risk, particularly due to the derivative positions it takes. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds, equities and other securities, indexes and currencies - provided it sees the opportunity to make substantial gains. In this respect the fund belongs in the category of opportunistic funds that pursue a multi-strategy investment approach. Within the multi-strategy approach pursued by the fund, 'global macro', 'long-short equity', 'convertible bond arbitrage' and 'managed futures'-type transactions dominate. In terms of asset class, the fund's investments can be divided into three main groups: it takes on extra risk in the bond, currency and equity markets, and in these markets it is prepared to take up both long and short positions within the maximum limits permitted by law, which currently allow double leverage for funds of this type. In its investment decision-making mechanism the fund assesses fundamental, pricing, technical and behavioural/psychological factors. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. To ensure liquidity the fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

MARKET SUMMARY:

There were big changes in December on both sides of the pond. In England it became final that they will the EU, and in the U.S. President Trump hit a friendlier tone with the Chinese, he will not escalate the trade war, and will not implement new tariffs. In its usual December meeting, FED president Jay Powell announced that he would raise rates only if he sees a permanent rise in inflation. Based on the macroeconomic numbers, the U.S. economy is steadily growing, the factory orders grew by 0,3% and the weekly unemployment rate is at a 7 months low. The Eurozone economy is not as bright. The industrial output and PMI numbers do not show an optimistic future yet. Lagarde, the new ECB president announced in her first press conference, that she thinks that the euro economy needs more supportive action from the central bank, as long as inflation remains at these levels. The largest economy in Asia beginning to recover from its slowdown. The Chinese Caixin index went to a seven months high. But because of the swine flu, the YoY inflation reached 4,5% in November, which was higher than expected, and overall it was a lot higher than October's 3,8%. In Hungary the central bank didn't change its leading interest rate. The HUF is trying to consolidate at around the 330 EUR/HUF level. The fund had a positive month in December. During the month when the Romanian yields jumped to 5% the fund bought hedged Romanian government bonds, and when the HUF strengthened the hedge was reduced by 4%. Also, during the HUF strengthening all but the ruble currency exposures were hedged to 30%. The stake in gold that was sold in November was bought back in December. 100% of the Atrium stake was sold last month. The exposure in the regional oil, bank and insurance sectors was increased in December.
