Net Asset Value of institutional series:	5,055,293,077 HUF
Net Asset Value per unit:	1.111083 HUF

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

MARKET SUMMARY:

In December, the US and China were reported to have reached a 'phase-one' trade deal. The Conservatives won a large majority in the UK election. US lawmakers reached a bipartisan deal in principle to avoid a government shutdown. The Fed and the ECB remained on hold and intend to stay that way for a while. Range-trading prevailed during most of the week as markets awaited central bank meetings, the UK election and some direction on trade. In the latter part of the month, sentiment turned more positive. Bond yields inched higher with 10Y Bunds approaching -0.19% and 10Y UST yields reaching close to 1.92%. EUR-USD moved back above 1.12, the CNY fell below 7.00 and the GBP rallied on the back of the election results. Credit spreads tightened across both Europe and the US. Moreover, equities attracted more solid demand and major indices are closing the month 1.5-4.0% higher. We decreased our Azeri exposure, initiated a smaller position in Ecuador and extended duration in Ukraine.

ASSET ALLOCATION OF THE FUND ON 12/31/2019
