INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

There were big changes in December on both sides of the pond. In England it became final that they will leave the EU, and in the U.S. President Trump hit a friendlier tone with the Chinese, he will not escalate the trade war, and will not implement new tariffs. In its usual December meeting, FED president Jay Powell announced that he would raise rates only if he sees a permanent rise in inflation. Based on the macroeconomic numbers, the U.S. economy is steadily growing, the factory orders grew by 0,3% and the weekly unemployment rate is at a 7 months low. The Eurozone economy is not as bright. The industrial output and PM numbers do not show an optimistic future yet. Lagarde, the new ECB president announced in her first press conference, that she thinks that the euro economy needs more supportive action from the central bank, as long as inflation remains at these levels. The largest economy in Asia beginning to recover from its slowdown. The Chinese Caixin index went to a seven months high. But because of the swine flu, the YoY inflation reached 4,5% in November, which was higher than expected, and overall it was a lot higher than October's 3,8%. In Hungary the central bank didn't change its leading interest rate. The HUF is trying to consolidate at around the 330 EUR/HUF level. The fund had a good month in December and outperformed its benchmark. We kept the Hungarian and Czech weight while increased the Polish exposure. The best performer was the Hungarian exposure, while the laggards were the Romanian and Polish equities.
