| Net Asset Value of CZK series: | CZK |
| Net Asset Value per unit: | 1.070491 CZK |

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achieve the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Moreover, the Fund can trade on the option market. The portfolio of the Fund is separated into three classes according to their investment objective: Instruments of the first class consist of long positions of long term, fundamentally undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short positions on the futures markets. These positions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%.

MARKET SUMMARY:

There were big changes in December on both sides of the pond. In England it became final that they will leave the EU, and in the U.S. President Trump hit a friendlier tone with the Chinese, he will not escalate the trade war, and will not implement new tariffs. In its usual December meeting, FED president Jay Powell announced that he would raise rates only if he sees a permanent rise in inflation. Based on the macroeconomic numbers, the U.S. economy is steadily growing, the factory orders grew by 0,3% and the weekly unemployment rate is at a 7 months low. The Eurozone economy is not as bright. The industrial output and PMI numbers do not show an optimistic future yet. Lagarde, the new ECB president announced in her first press conference, that she thinks that the euro economy needs more supportive action from the central bank, as long as inflation remains at these levels. The largest economy in Asia beginning to recover from its slowdown. The Chinese Caixin index went to a seven months high. But because of the swine flu, the YoY inflation reached 4,5% in November, which was higher than expected, and overall it was a lot higher than October's 3,8%. In Hungary the central bank didn't change its leading interest rate. The HUF is trying to consolidate at around the 330 EURHUF level. The fund had a positive month in December. At the December lows the fund had increased its weight in the polish market. Also, the fund increased its stake in the EM internet sector and in certain oil sector companies. During the month, into the HUF strength, the fund opened unhedged currency positions.
