Net Asset Value of HUF series:	13,831,656,410 HUF
Net Asset Value per unit:	2.687324 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

Magyar Államkötvény 2020/O	interest-bearing	Államadósság Kezelő Központ Zrt. (HU)	2020.05.20

MARKET SUMMARY:

Risk assets continued to perform well in December. The outcome of UK elections, bottoming PMIs and news about the US-China phase 1 trade deal all supported sentiment. Bond yields and equity markets rose slightly while EM bond spreads tightened. We bought Romanian local currency bonds and took profit on our credit positions in Azerbaijan and Croatia, reinvesting part of the proceeds in Pemex bonds. We closed the rest of our US duration risk hedge. We increased the weight of EM equities particularly focusing on the laggard Polish market that priced in a lot of bad news. We opened some positions versus the HUF as the EUR/HUF exchange rate fell below 330.

ASSET ALLOCATION OF THE FUND ON 12/31/2019
