 Total Net Asset Value of the whole Fund: 15,364,484,229 HUF
 Net Asset Value of EUR series: 1,421,785 EUR
 Net Asset Value per unit: 4.035001 EUR

INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

In February, investors focused on the spread of the coronavirus from China to other parts of the world. By the end of the month, the virus was already present in Europe, causing investors to panic and a selling wave swept thru the markets. In the last third of the month, US indices hit new all-time highs, but as the virus spread more and more in Europe, markets began to plummet and most indexes fell to levels not seen since last October. The FED president also highlighted the coronavirus epidemic as a potential risk and threat to the economy and said that they are responding to incoming data, meaning that all decisions are data dependent. The outlook deteriorated significantly in the February ZEW Business sentiment index, which is one of the first to reflect the outbreak after the outbreak, according to European macro data. According to a monthly report from the German Ministry of Finance, the coronavirus epidemic poses a risk to German and European economic activity, but is still holding this year's 1.1 percent growth expectation. This is reflected in the exchange rate of the euro, which reached a new multi-year low against the dollar. The impact of the virus is most visible in the Chinese economy. Caixin China's manufacturing PMI in January was lower than expected at 51.3 to 51.1, but the survey does not yet include a major economic slowdown due to the epidemic. In Hungary, the forint has fallen to a new low against the euro. The MNB did not take 340 level lightly and intervened verbally in the interest of the Forint. As a result, the forint appreciated to the level of 335, but it is not yet known whether this appreciation will be permanent or not. The fund posted a negative return in February and underperformed its benchmark index. During the month, the allocation has not been changed. Polish and regional utility companies continue to be underweight. The fund is overweight due to its long-term positions.

ASSET ALLOCATION OF THE FUND ON 02/29/2020
