Total Net Asset Value of the whole Fund:	106,459,876 PLN
Net Asset Value of institutional series:	316,178 PLN
Net Asset Value per unit:	1.117516 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, low-risk investment vehicle, but to offer investors better returns than the performance of the current benchmark index. The fund is a standard variable net asset value money market fund. The portfolio elements are selected in accordance with these and the Money Market Funds' principles. The portfolio elements are selected in accordance with the above mentioned principles and based on the EU wide regulation on money market funds. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills issued by the Polish Debt Management Agency, and short-term instruments (e.g. deposits, repos) available on the interbank market. The fund is allowed to invest in securities issued or guaranteed by any EU member state, and in money market instruments issued or guaranteed by a supranational institution established in the EU in accordance with the Money Market Funds Regulation. The fund is only allowed to invest in debt securities, which are classified as investment grade on average by the external credit rating agencies. In addition, some financial assets, which are particularly addressed by the EU wide money market regulation, shall have a favourable assessment based on the internal credit quality assessment procedure. The fund may also hold investment units or shares within the framework of the Money Market Funds Regulation. The Fund invests at least 50% of its assets in PLN denominated assets (money market instruments issued or guaranteed by the Polish state; deposits; cash), also fulfilling the diversification requirements of the Money Market Funds Regulation. The Fund shall have a weighted average maturity no more than 6 months, and a weighted average life no more than 12 months. Moreover, the Fund shall also be allowed to invest in money market instruments with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. The fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk (the difference between the currency risk exposure of the derivative instrument and the hedged instrument can be maximum 5%). Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY:

In February, the Polish bond market saw a sharp decline in yields, mainly due to the risk aversion surrounding the coronavirus. Yields were down 20 basis points at the 3-year maturity, 27 bps at the 5-year maturity and 37 bps at the 10-year maturity. Thus, the yield curve has flattened. Moving further on the economic data, the Polish economy expanded by 3.2% in the last quarter of 2019, thus slightly outperforming market expectations. Forecasts for the first and second quarters of 2020 have been revised downwards, from 3.6% to 3% and 3.4% to 3% respectively. Forecasts for both 2020 and 2021 show an increase of 3.3%. Year-on-year inflation accelerated to 4.4% in January, ahead of expectations. This has been the highest inflation rate increase since October 2011, mainly due to rising food prices. The Purchasing Management Index rose 48.2 points in February from 47.8 points in January, thus exceeding expectations of 48 points. For the 16th consecutive month, this is below the 50-point mark, which was mainly due to the fact that new orders and exports continued to fall in February. Industrial production grew 1.1% in the first month of the year, although slower than in the previous month, but still exceeded market expectations. As far as the government's budget, according to the Ministry of Finance, the 2019 deficit was PLN 13.67 billion. In the first month of the New Year, a budget surplus of PLN 3.477 billion was recorded.
