Net Asset Value of HUF series:	3,229,020,662 HUF
Net Asset Value per unit:	1.657694 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The further spread of the corona virus determined the functioning of the world's economies in April. By the beginning of the month, almost all of the world's developed economies had shut down and people had been quarantined. The US stock market reached its lowest point in late March and has rallied by 30% since then. In April, the Fed announced that it would not only help the U.S. economy with loans and other financial aid, but were also willing to buy junk bond funds and thus indirectly have a say in the mechanism for allocating and pricing in the U.S. capital markets. Preliminary data confirms the central bank's actions because data shows that more than 20 million people lost their jobs in U.S.A and GDP also fell by 4.8% annualized, in the first quarter. The situation in Europe is similar to that in the United States. According to Deutsche Bank, the protracted epidemic could result in an unprecedented 13.3 percent drop in GDP for 2020. The Chinese economy is beginning to recover from the recession caused by the virus. The manufacturing PMI rose to 52 in March and there were some signs that Chinese industrial production was growing too - of course from a very low base. The Caixin Chinese manufacturing purchasing managers index was 50.1 in March, which is higher than expected. The effect of the corona virus could also be felt in Hungary. At the beginning of the month, the forint fell to a historic low against the euro. In reaction, the Hungarian National Bank raised interest rates, and as a result the forint strengthened by more than 5%. On the Budapest Stock Exchange, the share price of OTP and MOL fell to a multi-year low. The fund achieved a positive return in April and outperformed its benchmark index. Within developed markets, America achieved the best returns, followed by Europe and Japan. Thus, the US market overweight and the European market underweight contributed the most to the over performance of the fund. Within U.S. equities, we continue to hold the growth sector overweight, which was also a good decision in April hence, this sector was able to realize a greater rally. The fund continues to pursue a growth strategy within the U.S. market, with the video game, technology, and fintech sectors overweight.

ASSET ALLOCATION OF THE FUND ON 04/30/2020
