Start:	12/11/2007
Currency:	EUR
Total Net Asset Value of the whole Fund:	15,129,722 EUR
Net Asset Value of EUR series:	1,356,604 EUR
Net Asset Value per unit:	1.049218 EUR

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	11.84 %
WAM (Weighted Average Maturity):	7.16 years
WAL (Weighted Average Life):	9.47 years

MARKET SUMMARY:

Last month, the European Commission proposed a package that includes a EUR 750bn recovery instrument, of which two-thirds would take the form of grants, while the rest would be made up of loans. The Ifo Business Climate Index recovered somewhat from the trough it reached in April, suggesting that German economic activity will take time to return to pre-pandemic levels. Eurozone PMs bottomed out in May, but remained far from the 50-threshold that distinguishes expanding from contracting economic activity. In financial markets, focus on public support measures outweighed geopolitical concerns in the context of US-China relations. Major equity indices increased by 2-5%. Bunds came under moderate pressure, with 10Y yields rising by 12bp, while USTs traded sideways. Semi-core and periphery EGBs strongly outperformed, supported by the proposed recovery fund and reassuring statements from ECB officials on the flexible use of capital keys within the PEPP. European cash credit markets rallied across sectors, with subordinated and HY bonds, as well as bonds from cyclical sectors, outperforming. Underpinned by persistent risk appetite, EUR-USD rose by 1.1% to a two month high of 1.11. We opened positions in Serbia and Petroleos Mexicanos, moderately increased exposure to Croatia and Ukraine in conjunction with slight decrease of duration for Azəri and Kazakh quasi-sovereigns.

ASSET ALLOCATION OF THE FUND ON 05/31/2020
