Net Asset Value of HUF series:	19,834,635,662 HUF
Net Asset Value per unit:	5.658591 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

In June the Monetary Council of the NHB has cut the interest rate by 15 basis points for the first time in four years, with base rate now standing at 0,75%. The monetary easing surprised everyone, as the market expected the earliest rate cut only from September. As a result of this, the exchange rate of the HUF started to plummet. At the press conference following the meeting they emphasized that this is not the beginning of a rate cut cycle, but two days later the new deputy governor hinted at another rate cut possible next month. After this, on the 3 and 5 year maturity the yields declined. The long end of the yield curve started to increase at the beginning of the month then declined somewhat, but still closed the month higher. So the yield curve has steepened. Regional valuation is supportive for Hungarian government bonds, in the short run Hungarian National Bank may have the biggest intention to ease in our region, steepness of the yield curve is relatively high, however after NBH stopped its QE programme, long end part of the yield curve is not performing well. At the beginning of June the government issued the first green Eurobond, which was a success, because oversubscription was more than five-fold.

ASSET ALLOCATION OF THE FUND ON 06/30/2020
