Total Net Asset Value of the whole Fund:	3,328,992,074 HUF
Net Asset Value of PI series:	13,137 PLN
Net Asset Value per unit:	1.010536 PLN

## INVESTMENT POLICY OF THE FUND:

The objective of the fund is to benefit on the economical growth of emerging countries. The fund accomplishes this goal basically via individual equity investments, however it may also hold collective investment instruments, if it is necessary for the efficient management of the portfolio. These can primarily be ETFs listed on the stock exchange, bank deposit, account money, repo transactions, and open-end public investment funds. In the course of selecting the equities the Fund dedicates special attention to the compliance of individual companies with ESG (environmental, social, governance) criteria, so in addition to analyzing the financial factors, portfolio managers also take into consideration environmental, social and governance factors during the investment decision making process. The goal of the Fund Manager is to establish a portfolio, in which the average of indicators measuring ESG compliance of the individual companies is more favorable than the aggregated indicator of the benchmark index, i.e. their operation is characterized by more advanced environmental, social and governance responsibility. Environmental criteria include elements in the course of which the company comes into contact with the environment. Besides these, no additional special goals are set by the Fund. These include for example the energy utilization, waste management, pollutant emission and/or the preservation of natural resources. Social criteria include all relations maintained by the company with its external partners, customers and internal employees. Corporate governance criteria are legal factors impacting reliable operation of a company.

## MARKET SUMMARY:

Just like last few months the corona virus was the focus of world's attention in June. The first wave of the epidemic appears to have subsided in Asia and Europe, while in the United States it depends on the state what stage it is at. This is a major problem for the economy. The US Federal Reserve is doing everything it can to ease the pressure on the economy, but it does not have unlimited power. The taboos are starting to fall, as the St. Louis Fed President has already admitted that even negative interest rates could be used to kick-start the economy. In Europe, the ECB is working feverishly to figure out how to get the economy back on track as soon as possible. The central bank has increased its bond-buying program to € 600 billion, compared to the expected € 500 billion, and its duration has been extended to at least the end of June 2021. More and more positive economic data is coming out of China. What may cast a shadow over the joy that nearly 80 new infections have been found in Beijing by Sunday, raising the possibility that the second wave of the virus has arrived. In Hungary, the MNB reduced the key interest rate by 15 basis points at its June meeting. The decision is incomprehensible to us, as EURHUF has finally stabilized around 340 and 15 basis points is insignificant for the economy. The MNB also indicated that a further decline in interest rates is expected. The forint did not take the news well, and weakened by almost 5% against the euro within a week. The fund achieved an outstanding return in June and also outperformed its benchmark. Emerging markets far outperformed developed markets in the previous month. Within the larger markets, Brazil and Taiwan achieved the best returns, while Korea slightly underperformed. The fund is currently underweight in Brazilian and Thai equities, while overweight in the core Asian markets. In addition, we also increased the weight of the Central European region in the fund during the month. The fund slightly underweight against the benchmark and we bought individual gold stocks under a more defensive strategy.

## ASSET ALLOCATION OF THE FUND ON 06/30/2020
