Net Asset Value of institutional series:	4,851,992,540 HUF
Net Asset Value per unit:	1.103325 HUF

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	12.05 %
WAM (Weighted Average Maturity):	7.58 years
WAL (Weighted Average Life):	10.14 years

MARKET SUMMARY:

June saw another strong performance for risk assets. Much of these gains have come about thanks to slowing rates of case growth and moves to reopen major economies, as well as remarkable levels of stimulus from governments and central banks across the world. However, in the last couple of weeks, there've been signs once again of an acceleration in case growth in some countries, including the United States, raising fears for where things might be headed in the second half. In the US, nonfarm payrolls were better than expected, showing an increase of 4.8 million in June, while the unemployment rate dropped by more than 2% to 11.1%. COVID-19 cases have continued to rise, especially in southern and western US states. Investors reacted to the US labour market report with optimism. Equity markets, which had increased by about 3% in the days before, gained further after the release. In credit markets, IG cash underperformed amid a continued wave of new supply, while riskier parts of the credit universe were sought after. We closed positions in Serbia and Qatar, moderately increased exposure to Socar (Azeri quasi-sovereign) and to Kazakhstan as well as opened position in Ghana.
