Total Net Asset Value of the whole Fund:	137,045,330 PLN
Net Asset Value of institutional series:	317,011 PLN
Net Asset Value per unit:	1.120460 PLN

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, low-risk investment vehicle, but to offer investors better returns than the performance of the current benchmark index. The fund is a standard variable net asset value money market fund. The portfolio elements are selected in accordance with these and the Money Market Funds' principles. The portfolio elements are selected in accordance with the above mentioned principles and based on the EU wide regulation on money market funds. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills issued by the Polish Debt Management Agency, and short-term instruments (e.g. deposits, repos) available on the interbank market. The fund is allowed to invest in securities issued or guaranteed by any EU member state, and in money market instruments issued or guaranteed by a supranational institution established in the EU in accordance with the Money Market Funds Regulation. The fund is only allowed to invest in debt securities, which are classified as investment grade on average by the external credit rating agencies. In addition, some financial assets, which are particularly addressed by the EU wide money market regulation, shall have a favourable assessment based on the internal credit quality assessment procedure. The fund may also hold investment units or shares within the framework of the Money Market Funds Regulation. The Fund invests at least 50% of its assets in PLN denominated assets (money market instruments issued or guaranteed by the Polish state; deposits; cash), also fulfilling the diversification requirements of the Money Market Funds Regulation. The Fund shall have a weighted average maturity no more than 6 months, and a weighted average life no more than 12 months. Moreover, the Fund shall also be allowed to invest in money market instruments with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. The fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk (the difference between the currency risk exposure of the derivative instrument and the hedged instrument can be maximum 5%). Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

## MARKET SUMMARY:

After a 40 basis point cut in interest rates at the end of May, yields showed some correction in June. While yields were relatively stable in the middle of the yield curve, they rose by 5 basis points at the 3-year maturity and by 14 basis points at the 10-year maturity, leading to a steepening yield curve. Moving on with economic data, the Polish economy is expected to face a deep recession this year. GDP is expected to shrink by 4% in 2020, with growth of 4.1% in 2021 and 3% in 2022. GDP expectations for the second and third quarters were also revised, the former from -8.4% down to -9% and the latter from -5.9% up to -5.6%. Year-on-year inflation rose to 3.3% in June, from 2.9% in May. The reason for the price increase is mainly to be found in the increase in the food and energy prices. The growth rate of price is currently above the central bank's 2.5% target, and inflation is also expected to reach 3% in 2020, so Prime Minister Morawiecki said that a V-shaped recovery from the crisis is possible. The Purchasing Managers' Index rose to 47.2 points in June from 40.6 points in May, exceeding expectations by 46.5 points. Although the indicator is still below the 50-point mark, there are already signs of recovery. New orders rose sharply and came close to pre-crisis levels. Employment is still declining, but at a slower pace. Industrial production produced a 17% decline in May, which fell short of market expectations. As the government budget, the cumulative deficit for the first three months was PLN 25,881.6 million, so the government in May generated a deficit of PLN 6,998.7 million. The 12-month rolling current account was 1.5% of GDP in April, a record high.

## ASSET ALLOCATION OF THE FUND ON 06/30/2020
