Net Asset Value of HUF series:	6,813,497,435 HUF
Net Asset Value per unit:	1.435714 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, excepted AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Aegon Emerging Europe Bond Fund	0.0%
Total:	100%

MARKET SUMMARY:

Just like last few months the corona virus was the focus of world's attention in June. The first wave of the epidemic appears to have subsided in Asia and Europe, while in the United States it depends on the state what stage it is at. This is a major problem for the economy. The US Federal Reserve is doing everything it can to ease the pressure on the economy, but it does not have unlimited power. The taboos are starting to fall, as the St. Louis Fed President has already admitted that even negative interest rates could be used to kick-start the economy. In Europe, the ECB is working feverishly to figure out how to get the economy back on track as soon as possible. The central bank has increased its bond-buying program to € 600 billion, compared to the expected € 500 billion, and its duration has been extended to at least the end of June 2021. More and more positive economic data is coming out of China. What may cast a shadow over the joy that nearly 80 new infections have been found in Beijing by Sunday, raising the possibility that the second wave of the virus has arrived. In Hungary, the MNB reduced the key interest rate by 15 basis points at its June meeting. The decision is incomprehensible to us, as EUR-HUF has finally stabilized around 340 and 15 basis points is insignificant for the economy. The MNB also indicated that a further decline in interest rates is expected. The forint did not take the news well, and weakened by almost 5% against the euro within a week. The fund achieved a positive return in June, thanks to the rising stock markets. All exposures of the fund were able to achieve a positive return. The Panorama and Marathon rose the most, followed closely by Alpha and MoneyMaxx.

ASSET ALLOCATION OF THE FUND ON 06/30/2020
