Net Asset Value of HUF series:	1,882,556,461 HUF
Net Asset Value per unit:	1.095407 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

It appears that in Europe, the first wave of the corona virus has ended, but there are already signs that the second wave is about to start. EU Member States have opened their internal borders, but this situation can change at any time, depending on the infection rates. The situation in the United States is not as good. The states manage the epidemic independently, which resulted that, there are states where the number of new infections has already dropped to the European level, but there are also some, especially in the south-west where the infection rate is at new highs. U.S. lawmakers are also trying to adapt to this emergency situation, and have voted to extend the job retention program until August 8th. In addition, the Secretary of the Treasury is working on a proposal that would allow for another \$1,000 billion aid package. In Europe, Angela Merkel has softened the "thrifty four" to support the € 750 billion EU Reconstruction Fund. By the end of the month, the economic aid package and the € 1,074 billion European budget had been passed. The epidemic broke out in China first, so we can also say that they are also moving ahead of the rest of the world in economic recovery. This is shown by the better-than-expected June China Purchasing Managers' Index, with the manufacturing industry index at 50.9 and the service sector at 54.4, both data referring pre-pandemic times, a period of the official 6 percent economic growth. The fund had a negative return in July and the same performance as its benchmark. The fund maintains a neutral exposure in the large-cap, and underweight in the utilities and commodities sectors. The mid-cap sector remains overweighted. During the month, the exposure in the oil refining sector was reduced and the telecom sector was increased. By the end of the month, the fund was slightly overweighted against the benchmark.
