Net Asset Value of HUF series:	3,472,792,754 HUF
Net Asset Value per unit:	2.195967 HUF

## INVESTMENT POLICY OF THE FUND:

The fund aims to create an explicitly defensive investment portfolio for its investors, and typically invests in developed-market government bonds, and related exchange-traded derivative transactions, in the interest of achieving the highest possible return with the assumption of currency risk. The fund primarily aims for a portfolio consisting of the publicly issued bonds of foreign governments and foreign-domiciled companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, when purchasing international securities the fund only selects publicly issued securities that are listed on foreign stock exchanges. The proportion of non-investment-grade securities is maintained at a low level, and if the planned ratio is overstepped due to the downgrading of a given issuer the fund restores it under the conditions stipulated by the relevant legal provisions. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. In the course of its operation, however, the fund is managed on the premise that when compiling the portfolio, it is bonds that determine the nature of the fund. Accordingly, the proportion of bonds that may be kept in the fund at any given moment may reach the prevailing statutory maximum. When compiling the bond portfolio, taking into account the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. To ensure liquidity, the fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds; however, in accordance with the current statutory regulations the proportion of foreign bonds in the portfolio may be up to 100%. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory conditions.

## MARKET SUMMARY:

In July this year, EU leaders reached an agreement on the recovery fund as well as the long-term budget 2021-2027. Tensions between the US and China increased when the US ordered the closure of China's consulate in Houston and China retaliated by ordering the closure of the US consulate in Chengdu. Eurozone GDP reported a drop of 12.1% QoQ in Q2 '20, while US GDP reduced by a less severe 9.5% QoQ. The Fed remained on hold but reiterated that there were considerable risks to the US outlook amid a resurgence of coronavirus cases. Fed Chair Jerome Powell again flagged the need for more fiscal support, as Republicans and Democrats wrangled over a new fiscal package while enhanced unemployment benefits expire at the end of July. Under the spell of numerous GDP reports and a flurry of corporate earnings releases, performance in financial markets was quite mixed. Major equity indices were stable in the US but weaker in the Eurozone. Core bond markets firmed, especially after Mr. Powell's press conference, with 10Y Bund and UST yields dropping by 5-10bp to multi-month lows. Credit markets held up well, with credit spreads from cash bonds grinding slightly tighter amid the slowdown of issuance activity. The US dollar remained weak, the GBP rallied and EUR-USD conquered the 1.19 level. We slightly decreased our exposure to the long-term government bonds issued by the United Kingdom, increased exposure to the 5 years and 10 years U.S. government bonds as well as bought some more U.K. government papers.

## ASSET ALLOCATION OF THE FUND ON 07/31/2020

Asset type	Weight
Government bonds	75.21 %
T-bills	19.35 %
Current account	8.88 %
