Net Asset Value of HUF series:	6,694,471,184 HUF
Net Asset Value per unit:	1.417476 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Total:	100%

MARKET SUMMARY:

It appears that in Europe, the first wave of the corona virus has ended, but there are already signs that the second wave is about to start. EU Member States have opened their internal borders, but this situation can change at any time, depending on the infection rates. The situation in the United States is not as good. The states manage the epidemic independently, which resulted that, there are states where the number of new infections has already dropped to the European level, but there are also some, especially in the south-west where the infection rate is at new highs. U.S. lawmakers are also trying to adapt to this emergency situation, and have voted to extend the job retention program until August 8th. In addition, the Secretary of the Treasury is working on a proposal that would allow for another \$1,000 billion aid package. In Europe, Angela Merkel has softened the "thrifty four" to support the € 750 billion EU Reconstruction Fund. By the end of the month, the economic aid package and the € 1,074 billion European budget had been passed. The epidemic broke out in China first, so we can also say that they are also moving ahead of the rest of the world in economic recovery. This is shown by the better-than-expected June China Purchasing Managers' Index, with the manufacturing industry index at 50.9 and the service sector at 54.4, both data referring pre-pandemic times, a period of the official 6 percent economic growth. In Hungary, the MNB also reduced the key interest rate by 15 basis points at its July meeting to 60 bps. Based on the MNB's communication, we can say that the central bank fine-tuned its bond purchase program, and we can most likely say that we have reached the end of the interest rate cut cycle. The fund had a small negative return in July. Of the fund's investments, Moneymaxx and Bondmaxx achieved the best returns, while unfortunately the underperformance of the Alfa fund in July weighted heavily on the fund's performance.

ASSET ALLOCATION OF THE FUND ON 07/31/2020

Asset type	Weight
